DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 10-35 are rejected under 35 USC §103(a). This rejection is set forth in the prior Office action mailed on August 29, 2009.

Response to Arguments

3. Applicant's arguments filed February 23, 2007 have been fully considered but they are not persuasive.
 - Applicants' have amended the claims to include that the tissues are moist and argue that the tissue of the cited references is not moist, since it, the reference, teaches that the tissues have a dry feel. This is not considered convincing, because that a tissue has a dry feel, does not mean that the tissue is not moist, just that it feels like it. Moreover, the reference is clear that the meaning of dry feels means that it does not have a greasy feel, see column 4, lines 52-59.
 - Also applicants argue that the use of fatty acid is critical to the reference invention. While this might be true, the question is not that is critical to reference invention, but if the use of that particular component would significantly change

the claimed composition, since the composition is open to other components that do not critically change the claimed composition.

- Applicants also argue that the reference does not teach the use of unsaturated esters, which the examiner agrees. However, the examiner contention is that the use of such esters would have been obvious to one of ordinary skill in the art for the reasons indicated in the previous rejection.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

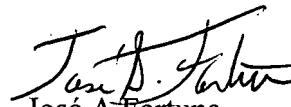

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
